

## **Lake MUD Homeowner's Association Newsletter**

Residents who live near the Lake Municipal Utility District detention pond have reported illegal dumping near the pond. This dumping is not only unsightly, it is illegal and renders maintenance of the pond by the District's contractors impossible. The District's Board of Directors asks that residents who live near the detention pond, and any others who happen to observe such incidents, report any incidents of dumping to the Harris County Pollution Control Hotline at 713-920-2831 (24 hour hotline) as soon as they occur. The District will do its part to maintain the pond and will look into additional security measures around the pond to prevent access to those who would use the pond for illegal dumping.
